

## Foreign Language:

Foreign Language is best to be learned in the very early years. Children are like small sponges and their ability to learn a foreign language will never be better than at the preschool age. The window of opportunity is between the ages of three years and 10 years. After that time to learn a foreign language is learned through a different part of the brain. It is much easier in the early years. Therefore we will take this opportunity to bring foundational learning skills to the children at R-Kidz.
